Where you can cycle
This key indicates the degree of speed and
experience needed on the roads around Kettering.
On yellow roads traffic is light and speeds are
low. As you gain experience you can explore
using the green and blue roads, but the pink and
purple roads may be intimidating unless you are
an experienced cyclist.

Children especially need to take care when
cycling as they are far more likely to be aware of
the dangers traffic can pose. Cyclists should
be particularly alert to other traffic in junctions
and near parked vehicles.
